

Equipment Instruction

Shaft Type and Flex

Presented by: [Connie DeMattia](#)

Purpose: Correct shaft type and flex will produce maximum distance, an ability to shape shots, ability to control trajectory, and preferred feel.

Note: Consider the following solutions when picking out a shaft.

If Trajectory Is Too Low	If Trajectory Is Too High
Softer Flex	Stiffer Flex
More Torque	Less Torque
Lower Flexpoint	Higher Flexpoint
Lighter Weighted Shaft	Heavier Weighted Shaft
